

PM 17 / PUREMAG mid bass

PM 17 is our top range mid bass driver which used an special assembly type basket made by Duralumin alloy machining . Its basic construction of PM 17 consist of a paper cone and an AlNiCo magnet system. And this magnet system we named "PUREMAG" is combined with the alnico magent and a top & bottom plates by special pure metal can made full use of its ability. The rigid and right weight cone driven by the clean magnetic circuit of PUREMAG can perform real organic, natural and impressive sounds spreads in wide frequency range. Further its quite low impedance at Fs contributes largely to the reproduction of substantial bass and treble sounds . All listeners who listen to PM 17 can cherish an ability of inspire excitement through it. PM 17 has been conceived to get optimal reproduction sound whic can impress deeply audio enthusiasts. Please feel an exquisite taste in PM 17 sounds !

PM 17 specification

Music power : 100W / Sensitivity : 88 dB / Frequency response : 70-6,000Hz / Outer dimension, Diameter : 170 mm / Fixing hole diameter : 145.2 mm / Installing depth : 65 mm / Impedance : 6 ohm

Frequency response curve in Enclosure (*for reference only)
